

Course Syllabus – Mrs. Daley

APP DEVELOPMENT 1 is an elective course for those with an interest in computers, computer programming and mobility. App Development 1 must be taken before App Development 2.

This course moves at a fast rate and is not intended for someone with weak computer skills nor is it for a student that does not have an honest interest in computers. Students will be working with online software to develop apps to be used on the iOS and the Android platform. Much of the work will be completed at your own pace however there will be time constraints for mastering the material and creating programs. Students not completing assignments on time will receive a reduced grade.

Course Goals:

- To familiarize the student with the various app development tools such as MIT App Inventor 2, Touch Develop and Swift.
- To learn to plan, design and create fun and useful apps for the dynamically changing 21st century.
- To familiarize the student with app development programming for iOS and Android platforms along with the art of computer science.

Grading: *based on a total point system*

- Quizzes/Tests
- Homework
- Programs/Projects

Rules of the Classroom:

- Come prepared - pen/pencil, folder with pockets, marble notebook everyday
- Respect the teacher's requests
- Respect your fellow classmates
- Passes are only given out for an emergency
- Be on time
- No cheating (as per MRHS Honor Code)
- No food or drink is allowed
- No vandalism

YOU ARE RESPONSIBLE FOR WORK MISSED.

* If you are absent the day of a test, you may be required to make it up the day you return.

Extra Help:

I am available in the morning and some days after school for help. Arrangements must be made a day in advance for extra help.
